

Stephen Pipino

Principal Security Specialist, Salesforce

Stephen Pipino is a Principal Security Specialist with Salesforce, where he supports Public Sector organizations as a pre-sales engineer with their secure adoption of Salesforce's PaaS and SaaS offerings. He works closely with DoD agencies and U.S. Government Contractors to provide expertise addressing security and compliance requirements associated with FedRAMP, the DoD Cloud Computing Security Requirements Guide, DFARS 252.204-7012, and CMMC.

Prior to joining Salesforce, Stephen built his career in information technology supporting the Federal Government with small startup vendors and large consulting firms. He has earned recognition as a Certified Salesforce Administrator, a Certified Enterprise Architect (CEA), a Certified Information Security

Systems Professional (CISSP) and a Registered DoD Risk Management Framework Practitioner (RDRP). He holds a Bachelor of Science in Information Sciences and Technology from the Pennsylvania State University and a Master of Science in Computer Science from the George Washington University.
